

## Ambient Temperature Sensor

### -20F to 275F range

RIFE Sensors Ambient Temperature Sensor is an easy to install ambient temperature sensor to track outside air temp, cabin temp, under-hood temp, anywhere around the vehicle. The sensor is housed in a Deutsch DTM04-2P socket and is completely sealed for long life.

#### **Specifications:**

Range: -20 to 275F

Accuracy: 1°F

Weight: 5.7 grams

Matching Connector: Deutsch DTM06-2S

Mounting Clip: Deutsch 1011-026-0205

#### **Installation:**

The sensor's light weight allows it to simply "hang" on the harness, it can also be attached to the harness with tape, shrink tube or zip-ties. It can also be permanently attached to the vehicle with Deutsch mounting clip # 1011-026-0205. When installing, make sure to leave the small black bead in the orange seal exposed to the air.

#### **Wiring:**

Pin 1: Signal

Pin 2: Ground

#### **Calibration:**

Calibration data can be found at [rifesensors.com/calibration](http://rifesensors.com/calibration)
